Forged Aluminium Alcoa® Wheels

Aluminium Alcoa® Wheels are forged from one piece of aluminium, without welds. They are corrosion-resistant and withstand the most severe tests (JWL-T, TÜV and LBF) easily.

Light

- Up to 250kg weight saving per articulated unit
- Up to 42% saving per wheel in unsprung weight
- Increased payload and driver comfort (see R.O.I. calculation on www.alcoawheelseurope.com)

Strong

- Unrivalled forged strength
- 5 times stronger than steel
- 5-year unlimited mileage guarantee

Economical

- Reduced fuel consumption
- Better heat dissipation
- Increased life duration of brakes and suspension
- Less tyre wear
- Lower maintenance costs
- Higher resale value

Innovative

At Arconic we listen to our customers' needs and come up with solutions, such as:

- Dura-Bright® EVO wheels: easy maintenance
- Dura-Flange® wheels: protection against rim horn wear
- WorkHorse® wheels: without ventilation holes for construction vehicles
- Many different wheel sizes, including 22.5x17.00 and 19.5x14.00 offset 120 mm

Environmentally friendly

- Made of high-strength aluminium alloy
- 100% recyclable
- Reduced CO₂ emission

Beautiful

- Improve the looks of your vehicle
- Timeless design: Brushed, LVL ONE® and Dura-Bright® EVO finishes

LVL ONE®

- Attractive, with a smoother and glossier surface than Brushed
- Great looks at entry level
- Basic maintenance, polishing needed

Dura-Bright® EVO

- Surface treatment that penetrates the aluminum and becomes an integral part of the wheel. It will not chip, crack, peel or corrode
- Low maintenance finish
- Fast payback: reduced effort & cost for maintenance

Cleaning Dura-Bright® wheels:

1. Use a water hose or high pressure cleaner to remove dirt.
2. Mix water with Dura-Bright® Wheel Wash.
3. Use the ALbrush to wash the wheel's surface and avoid scratches.
4. Rinse the wheel and wipe dry with a soft cloth.
